👤 PROFILE

Greetings, I am Alex and I am a junior front end developer passionate about new front end technologies and I am staying up to date in such a fast-growing domain and always determining customer needs. I love to work hard, I am doing my best to write clean code, I'm willing to learn new things everyday. I am currently seeking for an environment that will provide me both professional development (leading me to Full-Stack Role) and personal development.

★ My Work

[Personal Website Link](#)

This is my personal website where I showcase all my skills and projects.

Technologies, Tools and Skills : JavaScript, HTML, CSS, GIT, Responsive Design.

[React ToDo-List Link](#)

This is a styled To-Do-List including the ability to add and remove selected activities as well as editing and marking them as completed, the list contains a random motivational quote generator.

Technologies, Tools and Skills : JavaScript, HTML, CSS, React, GIT, Responsive Design.

[React App Chat Link](#)

This is a chat application updating real time where I implemented authentication and storing through Firebase, different styling based on the logged user and the messages are sorted by date.

Technologies, Tools and Skills : JavaScript, HTML, CSS, React, Firebase, GIT, Responsive Design.

[Instagram Clone Link](#)

As the title suggests, this is a demo to the well-known Instagram social media app, where you can upload new posts that are going to be ordered through Firestore and the auth is done by Firebase. You also have the ability to like / unlike posts and leave a comment.

Technologies, Tools and Skills : JavaScript, HTML, CSS, TailwindCSS, React, Firebase v9, Next.JS, Next-Auth, Recoil, Faker.js GIT, Responsive Design.

[Weather App Link](#)

An almost typical weather app but the catch is that the temperature is displayed from an external API (OpenWeatherMap). The user can search the city and change the degree measure unit.

Technologies, Tools and Skills : JavaScript, HTML, CSS, React, GIT, Responsive Design.
